AUTO-RENEW AND 365

Select annual licenses and permits purchased online include a voluntary auto-renew option, which automatically renews those purchases one year from the date of purchase.

License buyers may opt in or out of the auto-renew feature at any time through their online KDWPT account at kshuntfishcamp.com. Visit ksoutdoors.com/auto-renew for more information.

Many annual licenses and permits are now valid for 365 days from the date of purchase or 365 days from the expiration date of your current license. Visit ksoutdoors.com/365-licenses for more information.

HUNT/FISH MOBILE APP

Beginning in 2020, Kansas license holders will have the option of storing licenses and permits on a mobile device rather than carrying printed copies in the field. This feature is offered through KDWPT's newest mobile app, "HuntFish KS."

Also available: KDWPT's mobile campsite reservation app, "CampIt KS."

Download HuntFish KS and CampIt KS from Google Play and the Apple Store today.

LICENSES, PERMITS AND FEES

LICENSE REQUIREMENTS

Residents age 16 through 74 must have a resident license in possession while fishing in Kansas, unless exempt by law. **All nonresidents 16 and older must have a valid non-resident license to fish in Kansas.** Most licenses expire 365 days from date of purchase or 365 days from the expiration date of your current license, except one-day, five-day, five-year, multi-year youth, and lifetime fishing licenses.

Resident anglers age 65-74 are eligible for a senior Lifetime Pass, which is a combination hunting/fishing license valid for the lifetime of the holder for \$42.50; or half-price 365-day fishing (\$15) or fishing/hunting combination (\$25) licenses are available. Landowners and their immediate family living with them, and tenants renting land for agricultural purposes and members of their immediate family living with them are exempt from fishing license requirements on waters on their own land, except as described below under "License Requirements on Private Land."

Resident is defined as a person who has maintained the person's place of permanent abode in the state for 60 days immediately prior to purchase. Domiciliary intent is required, evidence of which may include the location where the person votes, pays personal income taxes or obtains a driver's license. A

residency of at least one year is required to purchase lifetime licenses.

Residents who are at least one-sixteenth American Indian by blood, and so certified by the Bureau of Indian Affairs, may apply to KDWP for a free fishing license, which must be in possession when fishing. All other laws and regulations apply to American Indians.

Persons on active duty in the armed forces who entered the service while residents of Kansas may purchase resident fishing licenses. Nonresidents on active military duty stationed in Kansas and nonresident students going to school in Kansas qualify for resident fishing licenses, and they must have evidence of active duty or enrollment with them while fishing.

Active members of the Kansas Army or Air National Guard are eligible for free fishing and hunting licenses and park permits. Legal Kansas residents who have been separated from the armed services under honorable conditions and have a disability certified by the Kansas Commission On Veterans Affairs as being service-connected and such disability is equal to or greater than 30 percent may apply through the Pratt Operations Office for free hunting and fishing licenses. Applications are also available on the KDWP website, ksoutdoors.com.

LICENSE REQUIREMENTS ON PRIVATE LAND

A fishing license is required on all public waters. In addition, a license is required for fishing on many private lands, including the following:

- any private impoundment that has a stream or river going into and/or out of it, whether the stream is intermittent or not;
- a private impoundment that is owned or operated by more than one person or group, in which case the owner or operator or member of the group would be exempt from the license requirement only while fishing on the portion of the impoundment they own;
- guests of landowners or operators fishing on streams and rivers on land solely owned or operated; and
- any impoundment stocked by the state within the last 10 years.

The sole owner of an impoundment or the land through which a stream flows does not have to have a fishing license. Guests may fish private land without a fishing license if it is a private waters fishing impoundment. (See "definitions" Page 12.)

LICENSES, PERMITS AND FEES

PERMITS

SPECIAL EVENT PERMIT

Special events conducted on KDWPT-managed lands and waters require special event permits if one of the following conditions exists:

- 1) an entrance, admission, or participation fee is charged;
- 2) food, merchandise, or services are offered for sale;
- 3) the exclusive use of a facility or a specified land or water area is required;
- 4) an organized or advertised competition will be conducted;
- 5) sound will be amplified that may disrupt area users; or
- 6) temporary structures, other than blinds or common camping equipment, will be erected.

An event sponsored by KDWPT does not require a special event permit.

Applications for special event permits are available at KDWPT offices. Each application for a special event permit shall be made to KDWPT not less than five weekdays before the event. The special event permit fee is negotiated based on event type, required services, and lost revenue; the maximum fee is \$200. Payment must accompany each application.

FISHING TOURNAMENTS

If you plan to hold a competitive fishing tournament on department-managed lands or waters, you may be required to obtain a special event permit. This includes tournaments launched from department facilities at state parks, state fishing lakes, or other department properties. You also may be required to pay a fee for the permit, depending on the size of the event and the services required. Contact the nearest KDWPT office (see Page 4) at least 30 days prior to the tournament date(s) to determine what requirements apply.

THREE-POLE PERMIT

Anyone, regardless of age, must purchase a three-pole permit to fish with three poles at one time.

ASSISTANCE PERMITS

Anyone with a permanent physical disability that prevents them from fishing may apply for a Disability Assistance Permit. The permit holder may designate another person to take, on behalf of and while accompanied by the permit holder, the permit holder's legal limit of game or fish. The person designated by the permit holder shall not be required to hold any licenses, permits, stamps. (This law

also applies to hunting.) For more information or applications, contact KDWPT, Law Enforcement Division, 512 SE 25th Ave., Pratt, KS 67124, (620) 672-5911 or any KDWPT regional office.

BLACK BASS TOURNAMENTS

All vessels used by participants in a weigh-in bass fishing tournament must have a working livewell that contains an electrolyte chemical-water solution, and the following procedures must be followed for weigh-in and release:

- one individual work crew support for each 10 anglers
- one weigh-in tank filled with an electrolyte-water chemical solution and fitted with recirculation and aeration accessories for every 25 anglers
- if the water at the tournament site is 75 degrees or cooler, the water in the weigh-in tank shall be maintained at the same temperature
- if the water temperature at the tournament site is warmer than 75F, weigh-in tank water shall be 5-10 degrees cooler but shall not exceed 85 degrees
- not more than four anglers shall be in the weigh-in line at any time
- weigh-in bags containing livewell water shall be reinforced, reusable, and capable of holding up to 15 pounds of live fish and 2 gallons of water
- the weigh-in site shall be located near the vessel mooring site and the release site, vehicle or vessel and under a portable awning, event tent or in the shade

Minimum requirements for releasing bass during a weigh-in fishing tournament include:

- fish shall not be released directly into the water after being weighed
 - if release tubes, vehicles or vessels are used, holding tanks shall contain a one-half percent noniodized salt solution
 - if release tubes, vehicles or vessels are not used, fish must be dipped in a 3 percent noniodized solution the same temperature as the lake water for 10-15 seconds before being released
 - the release site must have water at least 3 feet deep with good circulation and hard bottom
- Anglers participating in bass fishing tournaments from Sept. 1-June 15 and who possess a Tournament Black Bass Pass (\$14.50) may keep five fish as part of their five-fish limit, to be released after the weigh-in, that meet the statewide 15-inch minimum length limit but that are under a special length limit for the lake being fished. Tournament Black Bass Pass holders fishing in tournaments may also cull their catch after the daily creel has been reached, by releasing a small fish and replacing it with a larger one. The Tournament Black Bass Pass expires 365 days from date of purchase.

FEDERAL AID

Your purchase of a fishing license is an investment in the future of Kansas wildlife. The Kansas Department of Wildlife, Parks and Tourism uses your license dollars and funds from the Federal Aid in Sport Fish Restoration Program (Dingell-Johnson) to manage the diverse wildlife resources of Kansas. The Dingell-Johnson program is financed by anglers through federal excise taxes on fishing and boating equipment. With these dollars, the department can continue to conserve and enhance Kansas' natural heritage and fisheries habitats and ensure future generations the benefits of the state's diverse, living resources. Last year, KDWPT received nearly \$5 million in Dingell-Johnson federal aid funding.

Federal aid is based, in part, on the number of fishing licenses sold.

This program receives Federal financial assistance from the U.S. Fish and Wildlife Service. Under Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975, Title IX of the Education Amendments of 1972, the U.S. Department of the Interior and its bureaus prohibit discrimination on the basis of race, color, national origin, age, disability or sex (in educational programs). If you believe that you have been discriminated against in any program, activity or facility, or if you desire further information, write the address listed below:

**U.S. Fish and Wildlife Service
Office for Diversity and Civil Rights
Programs-External Programs**

4040 North Fairfax Drive, Suite 130
Arlington, VA 22203
[http://wsfrprograms.fws.gov/
Subpages/TRACS/TRACS.html](http://wsfrprograms.fws.gov/Subpages/TRACS/TRACS.html)

NEW FOR 2020

Duplicate Fees Reduced

A \$10 printing fee will no longer be charged for duplicate licenses. Duplicate licenses may be printed for free by logging into your account at kshuntfishcamp.com. Duplicate licenses may also be printed by any license vendor for a \$2.50 automation and vendor fee.

E-Licenses

License holders will soon have the option of storing licenses and permits on a mobile device rather than carrying printed copies in the field. E-licensing should be available in early 2020.

Text a Tip

Anglers may report illegal activity to their local game warden using text messages. See Page 38 for a complete list of game warden phone numbers by county.

Free Fishing Days

2020 Free Fishing Days are June 6 and 7.

Trotlines

Any float material used with a trotline must be constructed only from plastic, wood, or foam and must be a closed-cell construction (a solid body incapable of containing water).

Marion Reservoir

A 21-inch minimum length limit on walleye is now in place for Marion Reservoir. To view creel and length limits for all waters, see Pages 18-37.

Paddlefish Tagging

Paddlefish permit holders will soon have the option of electronically tagging their paddlefish. Using the department's electronic carcass tag system, paddlefish permit holders will be able to record the county, date, time of kill, and enter a photograph of the entire carcass – with sufficient clarity to display the species – before reducing the paddlefish to permanent possession. Paddlefish permit holders will receive a confirmation number upon successful submission which they will need to retain until the paddlefish is consumed, given to another, or otherwise disposed of.

F.I.S.H. Program to be Renamed

The Fishing Impoundments and Stream Habitat program, or F.I.S.H., will be renamed. Beginning in 2021, the program will be referred to as the Walk-in Fishing Access program, or W.I.F.A.

Wild-caught Bait

To reduce the spread of aquatic nuisance species, crayfish, leeches, amphibians, and mussels have been added to the list of wild-caught bait that may not be transported. See Page 41.

Reminder: Gifting Fish to Another

Legally taken sport fish may be given to another if accompanied by a dated, written notice that includes the donor's printed name, signature, address, and permit or license number. See Page 39.

GENERAL INFORMATION

LEGAL EQUIPMENT

Each angler is limited to two rods (three with three-pole permit) with no more than two baited hooks (single or treble) or artificial lures per line. An artificial lure is defined as a man-made fish-catching device used to mimic a single prey item. The umbrella rig, popularly called the Alabama Rig, may only have two separate lures with hooks.

Trotlines, Setlines, Floatlines

In addition to two rods, an angler may set one trotline with no more than 25 hooks, OR eight setlines with no more than two hooks each, OR eight floatlines with no more than two hooks each. Trotlines, setlines, and floatlines may not be set within 150 yards of any dam. Fishing lines, setlines, and trotlines must be checked at least once every 24 hours. Trotlines, setlines, floatlines, tip-ups, and unattended fishing lines must be tagged securely and plainly with the angler's name and address or KDWP number. A setline must be anchored at one point by an anchor weighing at least 25 pounds or attached to a fixed and immovable stake or object. Any float used with a setline or trotline shall be constructed only from plastic, wood, or foam and shall be a closed-cell construction (a solid body incapable of containing water).

Trotlines and setlines are prohibited on all department-managed waters under 1,201 surface acres. Other restrictions may be applied by posted notice.

Floatline Fishing

Floatline fishing is allowed year-round, 24 hours a day at Council Grove, Elk City, Fall River, Glen Elder, Hillsdale, John Redmond, Kanopolis, Lovewell, Tuttle Creek, Pomona, Toronto, and Wilson reservoirs. Anglers are allowed no more than eight floatlines. All floatlines must be under immediate supervision of the angler and must be removed from the water when fishing ceases. All float material shall be constructed only from plastic, wood, or foam and shall be a closed-cell construction. A "closed-cell" construction shall mean a solid body incapable of containing water.

Snagging

Except for paddlefish and nonsport fish, which may be snagged in designated waters during designated seasons (See Page 10), fish hooked anywhere but in the mouth shall be returned immediately, unrestrained, to the water.

Nonsport fish (See definition Page 12) may be taken by gig, crossbow, and bow and arrow. Blue, channel and flathead catfish may be taken by bow and arrow where no length limits on catfish are in effect **except in rivers and streams.**

LEGAL BAIT

Legal fish bait includes artificial lures, bait fish (as defined on Page 12), prepared bait, vegetable materials, artificial bait, worms, crayfish, leeches, amphibians and mussels.

Species listed as prohibited, threatened, endangered, or in need of conservation may NOT be used as bait. Any other **LEGALLY TAKEN** wildlife may be used, including sport fish of legal length taken by hook and line.

WILD-CAUGHT BAIT

Bait may be taken for noncommercial purposes.

- **Methods:** seine not larger than 15 feet long and four feet deep, with mesh not larger than 1/4 inch; fish trap with mesh not larger than 1/4 inch and throat no larger than 1 inch in diameter (must be tagged with angler's name and address); fishing line; or a dip or cast net with mesh no larger than 1 inch

- **Size:** baitfish, except gizzard shad, may not exceed 12 inches in length

- **Limit:** 500 per person

- **Legal waters:** statewide, except that seining is prohibited on department-owned waters

- **License requirement:** unless exempt by law, a fishing license is required

- **Use and movement:** Live baitfish, crayfish, leeches, amphibians, and mussels may be caught and used as live bait only within the common drainage where caught. However, bluegill and green sunfish collected from non-designated aquatic nuisance species waters may be possessed or used as live bait anywhere in the state. Live baitfish shall not be transported and used above any upstream dam or barrier that prohibits the normal passage of fish. Live baitfish collected from designated aquatic nuisance waters shall be possessed or used as live bait only while on that water and shall not be transported from the water alive.

COMMERCIAL BAIT

Live gizzard shad and amphibians may not be sold for bait. It is illegal to release live baitfish into any water or transport live baitfish from any waters. Baitfish should be disposed of on land or at designated disposal sites.

LIVEWELLS/BILGES

Livewells and bilges must be drained and drain plugs removed from all vessels being removed from waters of the state before transport on a public highway. No person may possess any live fish upon departure from any designated aquatic nuisance body of water (see Page 41).

UNLAWFUL ACTS

It is unlawful to refuse to allow law enforcement officers to inspect fish or wildlife in possession or devices or facilities used in taking, possessing, transporting, storing, or processing any wildlife. It is also unlawful to sell fish except as specifically authorized under a commercial fishing permit.

It is illegal to clip the fins, tag, or otherwise mark fish if they are to be released after catch.

POSSESSION

All fish taken shall have the head, body, and tail fin attached while in possession on the water. Sport fish taken must be kept until consumed, processed, taken home or given to another person, or released.

Legally taken sport fish may be given to another if accompanied by a dated, written notice that includes the donor's printed name, signature, address, and permit or license number.

FISHING PRIVATE LAND

Except in waters enrolled in the FISH program (see Page 50), anglers must obtain permission from the landowner or tenant to fish on private land. This also applies to anglers fishing from roadways, bridges, or railroad rights-of-way. Unless otherwise posted, all streams in Kansas other than the Arkansas, Missouri, and Kansas rivers are under private ownership of adjoining landowners. Those three large rivers are public up to the normal high-water line; however, fishermen must obtain landowner or tenant permission before crossing private property to fish them. (See License Requirements Page 6.)

BULLFROGS

Bullfrog season is open **July 1 through October 31**. Daily creel limit is eight. Possession limit is 24 bullfrogs. A valid fishing license is required to take, catch, or kill bullfrogs, unless exempt. Bullfrogs may be taken any time of day or night by dip net, gig, hook and line, hand, bow and arrow, or crossbow. A line must attach bow to arrow, and the arrow must have a barbed head. Any other method of taking bullfrogs is prohibited.

FISH LADDERS

No person may fish or collect bait within, cast fishing line or throw nets into or over, or trespass with the intent of fishing within a fish passage, fish ladder or fishway. A fish passage, fish ladder, or fishway is defined as a structure that facilitates the natural migration of fish upstream on, through or around an artificial barrier or dam.

CHUMMING

It is legal to bait or "chum" water to attract fish. Check city and county laws for waters managed by these localities.

TURTLES

Common snapping turtles and soft-shelled turtles may be taken year-round. Daily creel limit is eight, single species or in combination. Possession limit is 24. A valid fishing license is required (unless exempt). Legal equipment: hand, hook and line, setline, hand dip net, seine, turtle trap, or gig.

GENERAL INFORMATION

BOWFISHING

All waters are open to bowfishing, unless posted otherwise. Some bowfishing is permitted at city, county, township, or private lakes, but regulations vary, so consult local rules. Nonsport fish can be legally taken by bowfishing wherever bowfishing is allowed. Blue catfish, channel catfish and flathead catfish **may not be taken by bowfishing in rivers and streams** but may be taken by bowfishing in other waters where no length limits for these species are in place. Crossbows are legal. Bowfish anglers must have in possession a valid Kansas fishing license, unless exempt by law. Arrows must have barbed heads, and each arrow must be attached by a line to the bow. Waters within 50 yards of an occupied boat dock or ramp, occupied swimming area, occupied picnic site or camping area, and other occupied public-use areas are closed to bowfishing.

ICEFISHING

Icefishing with baited hooks or lures is legal on lakes, reservoirs, and streams. In addition to the allowed two rods, eight tip-ups may be used to icefish, unless otherwise posted. Tip-ups may have a maximum of two hooks each. Unattended tip-ups must be tagged plainly with the angler's name and address. County or city lakes may have local laws controlling such activity.

Motorized electric or gasoline-powered two-wheeled vehicles, all-terrain vehicles, work-site utility vehicles, golf carts, and snowmobiles may be operated on ice-covered department waters only for the purpose of ice fishing from one-half hour before sunrise to one-half hour after sunset. These vehicles shall enter onto the ice only from boat ramps and points of entry as established by posted notice.

Holes cut in the ice of public waters may be no more than 12 inches in diameter or 12 inches square.

HANDFISHING

(PERMIT REQUIRED FOR ALL AGES)

Handfishing, for flathead catfish only, is legal from sunrise to sunset **June 15 through August 31** at these locations: the entire length of the Arkansas River in Kansas, all federal reservoirs from beyond 150 yards of the dam to the upper end of the federal property, and on the Kansas River from its origin downstream to its confluence with the Missouri River. A special permit (\$27.50) is required in addition to a fishing license. Anyone handfishing may not use hooks, snorkeling or scuba gear, or any other man-made device OR possess any fishing gear except a stringer. Stringers may not be used until the fish are caught by hand and are at or above the surface of the water. No man-made object — such as a barrel, box, or bathtub — may be used to attract fish.

PADDFISH SNAGGING

(PERMIT REQUIRED)

The paddlefish snagging season is open **March 15 through May 15** on posted areas inside Chetopa and Burlington city parks on the Neosho River; Neosho River at Iola, downstream from dam to city limits; Marais des Cygnes River below Osawatomie Dam, downstream to posted boundary; and Marais des Cygnes River on the upstream boundary of Marais des Cygnes Wildlife Area, downstream to the Kansas-Missouri border and the Browning Oxbow of the Missouri River. Paddlefish may be snagged using pole and line with not more than two single or treble **barbless** hooks. Catch and release is allowed in Burlington, Chetopa, and Iola except that once attached to a stringer, a fish becomes part of the daily creel. The daily creel limit for paddlefish is two and the season limit is six. On Missouri River boundary waters, there is a 24-inch minimum length limit. There is a 34-inch minimum length limit on the Marais des Cygnes River. Measure paddlefish from the front of the eye to the fork of the tail.

A paddlefish permit (\$12.50, youth \$7.50) includes six carcass tags. However, an angler younger than 16 may use an adult's paddlefish permit while accompanied by that adult with at least one unused carcass tag in possession. Each paddlefish snagged and kept by the youth angler shall be included as part

of the daily limit creel limit of the permit holder. Immediately upon attaching fish to stringer, anglers must sign a carcass tag, record the county/date/time of harvest, and attach the carcass tag to the lower jaw of the paddlefish taken. Anglers must stop snagging once the daily creel limit of paddlefish is reached.

Paddlefish caught outside the paddlefish season or in non-snagging areas may be kept if they are hooked in the mouth.

No person may possess paddlefish eggs attached to the egg membrane of more than one fish. No person may possess more than 3 pounds of processed paddlefish eggs or fresh paddlefish eggs removed from the membrane. No person shall ship into or out of, transport into or out of, have in possession with the intent to transport, or cause to be removed from this state any raw unprocessed paddlefish eggs, processed paddlefish eggs or frozen paddlefish eggs. A paddlefish carcass must have all entrails removed before it is transported from Kansas.

Nonsport fish (carp, drum, grass carp, threadfin and gizzard shad, goldfish, gar, suckers including carsucker and buffalo, goldeye, and bowfin) may also be snagged in waters posted open to snagging during the paddlefish season. There are no limits on nonsport fish.

GENERAL INFORMATION

SPEARFISHING

Unless otherwise posted, spearguns, without explosive charge, may be used to take nonsport fish in waters posted "open to scuba and skin diving." Spears must be attached to speargun or person by a line.

STATE FISHING LAKES

Motorboats may be used on state fishing lakes for fishing and hunting only, **unless otherwise posted**. Wading and float tubing in state fishing lakes is legal as part of fishing, hunting, bullfrogging, and trapping.

FORT RILEY FISHING

The Fort Riley military installation or portions of it may be closed at any time, without prior notice, due to military activities. The military mission has precedence over the announced seasons. Fort Riley has 29 ponds and several streams that may be open to fishing. For more information, go to fortriley.isportsman.net or call (785) 239-6211. All individuals 16 and older are required to have a Visitor's Access Pass to recreate on Fort Riley, which can be acquired at the installation's Visitor Control Center, located just south of Henry Gate Access Control Point (Exit 301, I-70).

ONLINE FISHING REPORTS

The Kansas Department of Wildlife, Parks and Tourism (KDWP) has provided fishing reports to anglers for more than 25 years. Anglers can visit the KDWP website, ksoutdoors.com, click "Fishing," then "Fishing Reports." Scroll down to find the appropriate region of the state.

District fisheries biologists and department staff attempt to update fishing reports on individual lakes regularly whenever information is available. Reports are seasonal, usually starting in April and continuing through October. However, there may be times throughout the year when reports will be updated because new information is available or reports don't change because new information is not available. In some instances, biologists are stationed a considerable distance away from a lake under their management and they may not have the latest information.

Before travelling a long distance to fish, it's a good idea to check several sources for current lake information; call a local bait shop, state park office or local angler, in addition to checking the online fishing reports.

DISTRICT NEWSLETTERS

Fisheries biologists publish seasonal newsletters about the lakes they manage, providing information about sampling results, new projects, stocking data and more. Go to www.ksoutdoors.com, click "Fishing" at the top of the page, then click "Newsletter Request Forms" in the Fishing Quick Links box on the right-hand side of the page. Each newsletter you sign up for will be emailed.

Oh Manhattan!

VISIT MANHATTANKS.ORG

The Manhattan region offers plentiful public hunting and fishing lands with 100 miles of wooded shoreline around the 1,200-acre Tuttle Creek Lake. Anglers catch crappie, catfish, bass, saugeye and other sport fish in the reservoir.

GENERAL INFORMATION

DEFINITIONS

Artificial Lure: A man-made fish-catching device used to mimic a single prey item. Artificial lures may be constructed of natural, nonedible, or synthetic materials. Multiple hooks, if present, are counted as a single hook on an artificial lure.

Baitfish: Minnow family (Cyprinidae), sucker family (Catostomidae), top minnows or killifish family (Cyprinodontidae), sunfish family (Centrarchidae), excluding black basses and crappie, which may be used only if legally harvested by hook and line. Baitfish exclude fishes listed as Kansas threatened or endangered species.

Calendar day: A 24-hour period from midnight to midnight.

Cast net: A circular or conical, weighted net designed to be cast, mouth downward, by hand and withdrawn by lines attached to its margin.

Culling: Replacing one live fish held by an angler for another live fish of the same species.

Creel limit: The maximum number of a species of fish, turtle or frog that can be taken per person in a calendar day.

Department-managed lands and waters: State parks, lakes and all other recreational or wildlife areas controlled by the department, including federal reservoirs.

Dip net: A small hand-held net with rigid support about the mouth used to land fish.

Fish Ladder: A structure that facilitates the natural migration of fish upstream on, through or around an artificial barrier or dam.

Floatline: Free-floating device attached to a single line with no more than two hooks. All float material shall be constructed only from plastic, wood, or foam and shall be a closed-cell construction. A "closed-cell" construction shall mean a solid body incapable of containing water.

Nonsport fish: Carp, drum, grass carp, threadfin and gizzard shad, goldfish, gar, suckers (including carpsuckers and buffalo), eel, shovelnose sturgeon, goldeye, and bowfin.

Possession limit: The maximum total number of a species that can be retained per person at one time.

Prohibited species: Walking catfish, silver carp, bighead carp, black carp, snakehead fish, round goby, zebra mussel, marbled crayfish, quagga mussel, white perch, fertile (diploid) grass carp, New Zealand mudsnail. (It is illegal to possess or release any live wildlife species listed above.)

Setline: A string or cord that is anchored at one point by an anchor weighing at least 25 pounds or is attached to a fixed and immovable stake or object, does not have more than two hooks, and is not associated with a hand-operated mechanical reel. Any float used with a setline shall be constructed only from plastic, wood, or foam and shall be a closed-cell construction.

Snagging: The hooking of a fish in any part of its body other than the inside of the mouth.

Tip-up: An icefishing device designed to signal the strike of a fish.

Sport fish: Northern pike, walleye, sauger, saugeye, yellow perch, striped bass, white bass, wiper (white bass/striped bass hybrid), black bass (largemouth, spotted, and smallmouth), trout, channel catfish, blue catfish, flathead catfish, paddlefish, and panfish (bullhead, black and white crappie, bluegill, redear sunfish, green sunfish, warmouth, and rock bass).

Take: To harass, harm, pursue, shoot, wound, kill, molest, trap, capture, collect, catch, possess or otherwise take or attempt to take.

Total fish length: The length as measured from the tip of the snout to the end of the tail, with mouth closed and tail lobes pressed together. (Except for paddlefish – see Page 10.)

Trotline: A line anchored at one point, with more than two hooks and not more than 25 hooks, and not associated with a hand-operated mechanical reel.

Private water fishing impoundment: One or more water impoundments: 1) constructed by man rather than natural, located wholly within the boundary of the lands owned or leased by the person operating the private water impoundments; and 2) entirely isolated from other surface water so that the impoundment does not have any connection either continuously or at intervals, except during periods of floods, with streams or other bodies of water so as to permit the fish to move between streams or other bodies of water and the private water impoundments, except that the private water impoundments may be connected with a stream or other body of water by a pipe or conduit if fish will be prevented at all times from moving between streams or other bodies of water and the private water impoundment by screening the flow or by other means.

COMMON CONCERNS

NATURAL RESOURCE OFFICERS

- It is illegal to refuse to allow a natural resource officer to check your license or inspect any fish in your possession.

POSSESSION/WANTON WASTE

- All fish taken shall have the head, body, and tail fin left attached while in possession on the water.
- Fish taken shall be retained until 1) cleaned, 2) taken home, 3) taken to a taxidermist or processor, 4) given to another person, 5) eaten, or 6) let go in the waters from which taken.

EQUIPMENT

- Fishing rods must be attended at all times unless tagged. Only two rods may be used unless a three-pole permit (Page 7) is purchased.
- Firearms may not be used to take fish.
- Nets may not be used to take sport fish. Dip or cast nets (mesh no larger than 1 inch) and seines (mesh no larger than 1/4-inch) may be used to take bait fish.

VEHICLES ON PUBLIC LAND

- Vehicles on public lands are restricted to maintained roads and must have vehicle registration.

STOCKING

- It is illegal to release any fish into public waters unless caught from that water. (See Aquatic Nuisance Species on Pages 40-42.)

LENGTH LIMITS DEFINED

Minimum length limits mean that fish shorter than a certain length cannot be kept. If the minimum length limit for bass is 15 inches, all bass shorter than 15 inches must be released immediately.

A slot-length limit prevents anglers from keeping fish within a certain size range. For example, if the slot length limit for bass is 13-18 inches, bass between 13 and 18 inches long must be returned to the water.

All fish caught that do not meet length limit requirements must be returned to the water immediately, unrestrained.

To determine fish length, measure from the tip of its snout, with its mouth closed, to end of the tail, lobes pressed together. However, the length of a paddlefish is taken by measuring from the front of the eye to the fork of the tail.

When using a flexible measuring device such as a tape, lay the tape on a flat surface and lay the fish along or on top of the tape to get an accurate measurement.

GENERAL INFORMATION

TROUT

From Nov. 1-April 15, all anglers fishing on Type 1 waters (see right) stocked with trout must possess a trout permit (\$14.50). Only anglers fishing for or possessing trout must have a trout permit on Type 2 waters. When required, all anglers 16 and older must have a trout permit. Anglers 15 and younger may fish for trout without a permit but they may only keep two trout per day. In addition, all residents age 16-74 and nonresidents 16 and older must also have a valid fishing license. Trout permits are available at KDWPT offices, most county clerk offices, license vendors, or online at ksoutdoors.com.

THE PERMIT IS VALID FOR 365 DAYS FROM DATE OF PURCHASE

Some local governments have their own trout stocking programs and may require a fee but not the state permit. Local city and county recreation departments have details.

Approximate trout stocking dates and sites may be found online at ksoutdoors.com.

LIMIT: The daily creel limit is 5 trout unless otherwise posted. Anglers 15 or younger may fish without a permit but are limited to 2 trout per day OR they may purchase a permit and take 5 trout per day. The possession limit is three times the daily creel.

PERMIT REQUIRED: Nov. 1-April 15, except trout fishing at Mined Land Wildlife Area Unit #30 (Cherokee County) requires a trout permit year-round.

TYPE 1 WATER - TROUT PERMIT REQUIRED OF ALL ANGLERS 16 OR OLDER

Coffeyville LeClere Lake, Dodge City Lake Charles, Eisenhower State Park Pond, Ft. Scott Gun Park Lake, Garnett Crystal Lake, Glen Elder Reservoir Outlet, Glen Elder State Park Pond, Kanopolis Seep Stream, KDOT East Lake in Wichita, Lake Henry in Clinton SP, Mined Land WA Unit #30, Pratt Centennial Pond, Historic Scott State Park Pond, Vic's Lake and Slough Creek in Sedgwick County Park, Walnut River Area in El Dorado SP, Willow Lake at Tuttle Creek SP, and Webster Stilling Basin.

TYPE 2 WATER - TROUT PERMIT REQUIRED ONLY FOR TROUT ANGLERS

Atchison City Lake No. 1, Cimarron Grasslands Pits, Colby Villa High Lake, Father Padilla Lake, Herington, Ft. Riley Cameron Springs, Ft. Riley Moon Lake, Great Bend Veterans Memorial Lake, Holton-Elkhorn Lake, Hutchinson Dillon Nature Center Pond, Lake Shawnee, Meade SFL, Salina Lakewood Lake, Syracuse-Sam's Pond and Cherryvale City Lake (Tanko).

ROBERT L. ROUDYBUSH

Available at:
www.amazon.com

This book, written by veteran fisherman and life-long angler, Bob Roudybush, describes in detail where and how to catch fish.

From the color photos of his favorite types of lures in the front of the book, to the descriptions in detail of how to fish for the different species of fish in the waters of the Midwest, Roudybush walks you through in great detail of how to find, for example, Crappie, and where you will find them and what baits or lures to use. He also covers Catfish, Bluegill, Walleye, White Bass, and more in detail.

You will also find a section on baits and some recipes for tasty fresh fish. If you are looking for successful fishing in lakes, streams, and rivers, this book will help you find it.

GENERAL INFORMATION

KANSAS DEPARTMENT OF HEALTH AND ENVIRONMENT CONSUMPTION ADVISORIES

As the state's environmental protection and public health agency, KDHE promotes responsible choices to protect the health and environment for all Kansans.

The Kansas Department of Health and Environment (KDHE) and the Kansas Department of Wildlife, Parks and Tourism (KDWP) are issuing fish consumption advisories for 2020. The advisories identify types of fish or other aquatic animals that should be eaten in limited quantities or, in some cases, avoided altogether because of contamination. General advice and Internet resources are also provided to aid the public in making informed decisions regarding the benefits as well as the risks associated with eating locally caught fish from Kansas waters.

WATERBODY SPECIFIC ADVISORIES FOR ALL CONSUMERS

Kansas recommends restricting consumption of bottom-feeding fish and catfishes to 4 servings per month from the following locations because of polychlorinated biphenyls (PCBs):

1. **Cow Creek** in Hutchinson and downstream to the confluence with the Arkansas River (Reno County);
2. **The Kansas River** from Lawrence (below Bowersock Dam) downstream to Eudora at the confluence of the Wakarusa River (Douglas and Leavenworth counties);
3. **The Little Arkansas River** from the Main Street Bridge immediately west of Valley Center to the confluence with the Arkansas River in Wichita (Sedgwick County).

Kansas recommends restricting consumption of bottom-feeding fish and catfishes to 1 serving per month from the following location because of PCBs:

1. **K-96 Lake** in Wichita (Sedgwick County).

Kansas recommends not eating specified fish or aquatic life from the following locations:

1. **The Arkansas River** from the Lincoln Street dam in Wichita downstream to the confluence with Cowskin Creek near Belle Plaine (Sedgwick and Sumner counties); bottom-feeding fish and catfishes because of PCBs.
2. **Shoal Creek** from the Missouri/Kansas border to Empire Lake (Cherokee County); shellfish because of lead and cadmium.
3. **The Spring River** from the confluence of Center Creek to the Kansas/Oklahoma border (Cherokee County); shellfish because of lead and cadmium.
4. **Antioch Park Lake South** in Antioch Park, Overland Park (Johnson County); all fish because of the pesticides dieldrin, heptachlor epoxide, chlordane, and dichlorophenyltrichloroethanes (DDTs).
5. **Arkalon Park Lakes** in Liberal (Seward County) – Kansas recommends not eating fish or other aquatic life because the lakes are sustained solely by treated municipal wastewater.

DEFINITIONS

Bottom-feeding fish: buffalos, carp, carpsuckers, bullhead and channel catfish, sturgeons, and suckers.

Predatory fish: blue catfish, crappies, drum, flathead catfish, largemouth, smallmouth, and spotted bass, perches, sunfish, white bass, wiper, striper, walleye, saugeye, and sauger.

Shellfish: mussels, clams, and crayfish.

Serving size (skinless fish fillets before cooking):

Adults and Children age 13 and older = 8 ounces

Children age 6 to 12 = 4 ounces

Children younger than 6 = 2 ounces

GENERAL ADVICE FOR EATING LOCALLY-CAUGHT FISH IN KANSAS

1. Sensitive populations should consider restricting their total mercury intake for both supermarket fish and locally caught species. Concerned parents and other persons may wish to consult with a physician about eating fish and mercury exposure.
2. Mercury exposure can be reduced by limiting the consumption of large predatory fish. Larger/older fish of all types are more likely to have higher concentrations of mercury.
3. Avoid the consumption of fish parts other than fillets, especially when eating bottom-feeding fish and catfishes. Fatty internal organs tend to accumulate higher levels of fat-soluble contaminants such as chlordane and PCBs than fillets.
4. Consumers can reduce their ingestion of fat-soluble contaminants such as chlordane and PCBs by trimming fat from fillets, and cooking in a manner in which fat drips away from the fillet.
5. Avoid subsistence level (relying on wild-caught fish for daily nutritional needs) fishing activities in large rivers within or immediately downstream of large urban/industrial areas and wastewater outfalls. Fish in these areas are more likely to contain traces of chemical contaminants.
6. Kansas recommends not eating fish or aquatic life from surface waters sustained solely by municipal or industrial wastewater because of unknown, yet potentially present pathogens, metals, organic chemicals or other emerging contaminants. This advisory includes consumption of any aquatic life present in wastewater outfalls, waste treatment lagoons or stormwater detention ponds.
7. In waterbodies where watches or warnings related to harmful algae blooms have been applied, fish should be consumed in moderation and care taken to only consume skinless fillets. Avoid cutting into internal organs and rinse fillets with clean water prior to cooking or freezing.

GENERAL INFORMATION

KANSAS DEPARTMENT OF HEALTH AND ENVIRONMENT CONSUMPTION ADVISORIES

STATEWIDE ADVICE FOR EATING LOCALLY-CAUGHT FISH BECAUSE OF MERCURY

The eating guideline tables below contain recommended consumption limits (based on mercury levels) for different kinds of fish and sizes (given in inches) caught in Kansas. The limits are protective of sensitive populations which includes women who are pregnant, nursing, or may become pregnant, and children younger than 17 years old. Kansas encourages anyone who regularly consumes fish to carefully consider the types and amounts they eat, including store-bought fish. For specific questions or concerns about mercury in Kansas fish please contact KDHE. For information about fish caught in other states, store-bought fish, and other seafood please visit (<https://www.epa.gov/choose-fish-and-shellfish-wisely>). By making informed choices consumers can enjoy the health benefits associated with eating fish without ingesting unhealthy amounts of mercury.

KDHE and KDWPT will provide advice for other commonly-eaten fish such as buffaloes, blue catfish, and suckers as more data become available. For species not listed Kansas recommends a limit of 4 servings per month.

How to Use the Eating Guideline Charts Below

Example: Crappie have a recommended limit of 8 servings per month. Within a months' time, if you eat 4 servings of crappie, then eat no more than ½ the recommended monthly limit of any other type of fish.

BOTTOM-FEEDING FISH	Size/Inches	Servings/Month
Bullhead	All Sizes	4
Channel Catfish	< 20"	8
	>20"	4
Common Carp	All Sizes	6
PREDATORY FISH	Size/Inches	Servings/Month
Crappie	All Sizes	8
Flathead Catfish	< 20"	4
	>20"	2
Freshwater Drum	All Sizes	4
Bass (Largemouth, Smallmouth, Spotted)	All Sizes	2
Sunfish (Bluegill, Green, Redear, etc.)	All Sizes	4
Bass (White, Wiper, Striped) and White Perch	< 20"	8
	>20"	4
Walleye, Sauger, Saugeye	< 20"	8
	>20"	4

BLUE-GREEN ALGAE IN KANSAS

Most bodies of water in Kansas are excellent homes for blue-green algae. Blue-green algae are bacteria that grow like plants. Blue-green algae in large numbers are common in standing water such as ponds or lakes especially during the summer months. When water temperatures warm and nutrient conditions are right blue-green algae will multiply very rapidly in what are referred to as algae blooms.

Blue-green algae have the ability to produce natural poisons (toxins) that can affect human and animal health. During the algae bloom the amount of toxin in the water can increase to dangerous levels. At larger lakes in Kansas, you may see signs posted warning that harmful algae is present and that contact with water should be avoided. Please obey the warnings for your own safety. On small lakes or ponds if you see a scum that looks like green paint in the water, the water has an unpleasant musty odor or you notice that several fish have died, avoid the water.

Recreational activities like swimming, wading, water skiing and boating increase the risk of exposure and ingestion. Contact with or ingestion of the water when high levels of toxins are present can cause nausea, vomiting, diarrhea, skin rash, eye irritation and respiratory distress. To protect yourself and your pets you should avoid contact and never drink the water. Pets and animals that drink waters that contain toxins are at risk for serious illness and possible death. If you have concerns that you or a pet may have become ill after an exposure to toxins in the water call your doctor or veterinarian or your local county health department. Visit www.kdheks.gov/algae-illness/algae_advisories.htm for updated alert listings.

BILGES AND LIVEWELLS

Livewells and bilges must be drained and drain plugs removed from all vessels being removed from waters of the state before transport on a public highway. No person may possess any live fish upon departure from any designated aquatic nuisance body of water (see Page 41).

**Check Your State
Income Tax Form For Nongame
Wildlife Conservation In Kansas**

GENERAL INFORMATION

FISHING ON THE MISSOURI RIVER

In agreement with the Missouri Department of Conservation, the Kansas Department of Wildlife, Parks and Tourism has established special rules regarding that portion of the Missouri River that borders both Kansas and Missouri. All fish caught from the Missouri River Boundary Waters that are a size or number that is illegal to possess shall be released unrestricted to the water immediately. **Aquatic Nuisance Species (ANS) Alert – Asian carp, zebra mussels, and white perch.**

License Requirements: Anglers with either a valid Kansas or Missouri fishing license may fish any flowing portion and backwaters of the Missouri River and any oxbow lake through which the river flows. They may fish from and attach any legal fishing equipment to the land adjoining these waters.

Limitations: Tributaries of the Missouri may not be fished without a valid fishing license from the state through which the tributary flows. If any law or regulation governing fishing in the Missouri River is different from the corresponding law or regulation in the state for which the angler has a license, the more restrictive state's law or regulation will apply. Each angler must keep all legally caught fish restrained separately from any other angler. Bow and arrow or crossbow with a barbed head and a line attached are legal only from sunrise to midnight. Each angler may use three fishing lines. In addition, each angler may use one trotline with no more than 25 hooks **OR** eight setlines with no more than two hooks each, **OR** eight floatlines.

Length Limits — minimum
Black bass: 12 inch
Paddlefish: 24 inch
Channel catfish: 15 inch
Sauger and Walleye: 15 inch

Daily Creel Limits
Black bass: 6
Paddlefish: 2
Channel catfish: 10
Blue catfish: 5
Crappie: 30
Flathead catfish: 5
Walleye, sauger, and their hybrids
 (single species or in combination): 4
Yellow bass, striped bass, white bass, and their hybrids
 (single species or in combination): 15

BOATS REGULATION CHANGES TO PFD'S (LIFE JACKETS)

NOTE: Any person under age 21 must complete an approved boater safety education course before operating a motorboat or sailboat on public waters in Kansas without being under direct and audible supervision. The law applies equally to residents and nonresidents.

The Kansas Boating Regulations Summary is available wherever licenses are sold and at ksoutdoors.com.

Any vessel propelled by sail or machinery of any kind (including trolling motors) used on Kansas public waters must be registered. Boat registration fees are \$42.50 for a three-year registration for **all** motor- or sail-propelled boats. Any boat required to be registered must have a Certificate of Registration on board and properly displayed registration numbers.

All boats, including kayaks and canoes, must be equipped with at least one wearable, Coast Guard-approved personal flotation device (PFD) – serviceable and readily accessible – for each person on board or being towed.

Persons 12 years and younger are required to wear PFDs when on board or being towed by any vessel.

In addition, boats 16 feet and longer, except kayaks and canoes, must be equipped with at least one throwable PFD on board. This applies to all vessels, and such devices must be readily accessible.

Motorboats may be used on state fishing lakes for fishing and hunting only, **unless otherwise posted.**

The U.S. Coast Guard has initiated changes to the rules involving labeling of personal floatation devices, also known as life jackets. The following should help explain these changes coming in Kansas regulations.

The traditional life jacket “types categories” have gone away. This includes the Type I, II, III and IV wearable life jackets and the Type IV, throwable. Older labeled life jacket using the Type classification will still be legal only if U.S. Coast Guard approved, in good serviceable condition, of the proper size/fit and worn in compliance with the label of the jacket.

The new labeling requirement falls into one of two categories, “wearable” and “throwable”. Wearable life jackets will be divided into five buoyancy categories: 50, 70, 100, 150, and 275 Newtons (metric to harmonize with Canadian standards).

Choose the level of buoyancy for the type of activity. A higher number equals to greater buoyancy. Make sure the label states the jacket is U.S. Coast Guard approved. Although a level

50 life jacket may be an available life jacket on the market, it will most likely not be a U.S. Coast Guard approved floatation device, so be vigilant in reading labels. The curved arrow indicates that the jacket is likely to turn an unconscious wearer face up in the water. A slash through the curve means the jacket will not perform this function.

For comparisons, the Type I jacket would carry either a rating of 100 or 150 Newtons and would upright an unconscious victim. The type II jacket would carry a rating of 70 newtons and would upright an unconscious victim. The type III jacket would also carry a rating of 70 newtons but would not be able to turn an unconscious victim with the face out of the water. A type IV throwable is labeled as a throwable device.

The type V jacket, also known as a special purpose vest may meet either a Type I, II, or III standard, but would now be either a 70, 100, 150 Newton rating with special icons to support the activity it is designed for.

SIZE AND FIT

Check label for user weight and chest size. Different body types float differently. A good fit is secure, comfortable, and adjustable.

PERFORMANCE

Lower number offers greater mobility, comfort, and style with good floatation for most people.

Higher number offers greater floatation, turning, and stability in the water.

RISK MANAGEMENT

In over 80% of boating fatalities, the person was not wearing floatation.

Most of these are sudden falls overboard or capsizes of a smaller boat.

The first moments in the water are critical, even for experienced swimmers.

Cold water shock causes gasping, loss of muscle control and swim failure.

Long term immersion in cold water requires thermal protection and floatation position to conserve energy.

Higher Number increases time to rescue.

Near Shore (Calm Waves)

Offshore (Large Waves)

FISHING FORECAST: TOP 10

Below is a preview of the *2020 Kansas Fishing Forecast*, highlighting the top 10 locations for some of Kansas' most popular sportfish species – Channel catfish, largemouth bass, walleye, crappie, wiper and saugeye.

Included in this preview are the top locations for each species, density rating, preferred rating, lunger rating and biggest fish caught during sampling. **Density Rating** is the number of fish that were high-quality size or larger sampled per unit of sampling effort. **Preferred Rating** identifies

how many above-average-sized fish a water contains. And **Lunker Rating**, similar to the Density Rating, tells you the relative density of lunker-sized fish in the lake.

To view a complete version of the *2020 Kansas Fishing Forecast*, visit ksoutdoors.com/Fishing/Fishing-Forecast or grab a copy of the 2020 March/April issue of *Kansas Wildlife & Parks Magazine* by calling (620) 672-0756.

LOCATIONS, LENGTH AND CREEL LIMITS

STATEWIDE CREEL AND LENGTH LIMITS

Individual waters may have different length and creel limits than those listed below. Check individual listings on Pages 18-37.

Daily Creel Limits

Channel catfish	10
Blue catfish	5
Walleye, sauger, saugeye (single species or in combination)	5
Rainbow trout, brown trout (single species or in combination)	5
Black basses	5
(largemouth, smallmouth, spotted, single species or in combination)	
Flathead catfish	5
Northern pike	2
Striped bass	5
Wiper (white bass/striped bass hybrid)	5
Crappie	50
White bass, bullhead, bluegill and all other legal species	No Limit
Paddlefish	2

Length Limits

Black basses	15"
(largemouth, smallmouth, spotted)	
Sauger	15"
Saugeye	15"
Walleye	15"
Northern pike	30"

The 15-inch minimum length limit for walleye, sauger and saugeye does not apply in rivers, streams and tailwaters.

THE POSSESSION LIMIT ON ALL FISH IS THREE TIMES THE DAILY CREEL LIMIT.

No person may possess live fish when departing a designated aquatic nuisance species (ANS) water. Designated ANS waters are listed on Page 40. Livewells and bilges shall be drained and the drain plugs removed from all vessels being removed from any waters of the state before transport on any public highway.

Once a daily creel limit of any particular species has been possessed, any other fish of that species that is caught must be released immediately, unharmed, into the water. It may not replace another fish already in the creel, except for participants in a weigh-in black bass tournament who posses a Tournament Black Bass Pass.

RESERVOIRS, STATE FISHING LAKES AND COMMUNITY WATERS

 **FFF** When you see this symbol next to the listing of a Community Fisheries Assistance Program (CFAP) lakes you'll know it's family friendly. At these locations, no alcohol is allowed, there are flush toilets, security patrols are conducted regularly, security lighting is in place, and fishing spots are easily accessible.

The Community Fisheries Assistance Program (CFAP) leases fishing rights on more than 200 community lakes to ensure no additional fees are charged anglers. If you see the "stop" symbol ● next to the community lake listing, you'll know this lake is not enrolled in CFAP and there may be a charge for fishing.

The following length and creel limits apply to those bodies of water from the lake dam and upstream to the public property boundary.

STATEWIDE

Impounded F.I.S.H. Waters

Channel Catfish - 2 fish daily creel limit.
Flathead Catfish - 5 fish daily creel limit.
Crappie - 50 fish daily creel limit. **Largemouth Bass** - 18-inch minimum length limit, 2 fish daily creel limit. **Walleye** - 15-inch minimum length limit, 5 fish daily creel limit. **Wiper** - 5 fish daily creel limit.

F.I.S.H. Stream sites

Channel Catfish - 10 fish daily creel limit.
Flathead Catfish - 5 fish daily creel limit.
Crappie - 50 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 5 fish daily creel limit. **Wiper** - 5 fish daily creel limit.

RESERVOIRS

Big Hill Reservoir

1,240 acres, 4 1/4 miles E of Cherryvale.
Channel Catfish - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 50 fish daily creel limit. **Largemouth Bass** - 15- to 21-inch slot length limit, 5 fish daily creel limit. **Smallmouth Bass** - 18-inch minimum length limit, 5 fish daily creel limit. **Spotted Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 18-inch minimum length limit, 5 fish daily creel limit.

Cedar Bluff Reservoir

6,869 acres, 13 miles S on K-147 from I-70 exit 135 Ogallah.
Channel Catfish - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 10-inch minimum length limit, 50 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Smallmouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Spotted Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 21-inch minimum length limit, 5 fish daily creel limit. **Wiper** - 2 fish daily creel limit.
ANS Alert - Eurasian Watermilfoil
ANS Alert - Zebra Mussels
(Live fish and aquatic bait may not be transported from this water)

LOCATIONS, LENGTH AND CREEL LIMITS

Cheney Reservoir

9,550 acres, 20 miles W of Wichita.

Blue Catfish - 35-inch minimum length limit, 5 fish daily creel limit. **Channel Catfish** - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 10-inch minimum length limit, 50 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 21-inch minimum length limit, 2 fish daily creel limit. **Wiper** - 21-inch minimum length limit, 2 fish daily creel limit. **Striped Bass** - 21-inch minimum, 2 fish daily creel limit.

ANS Alert - White Perch and Zebra Mussels
(Live fish and aquatic bait may not be transported from this water)

Clinton Reservoir

7,000 acres, 5 miles W of Lawrence on K-10.

Blue Catfish - 35-inch minimum length limit, 5 fish daily creel limit. **Channel Catfish** - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 10-inch minimum length limit, 20 fish daily creel limit.

Largemouth Bass - 18-inch minimum length limit, 5 fish daily creel limit. **Smallmouth Bass** - 18-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 15-inch minimum length limit, 5 fish daily creel limit. **Sauger** - 15-inch minimum length limit, 5 fish daily creel limit. **Wiper** - 18-inch minimum length limit, 2 fish daily creel limit.

ANS Alert - Zebra Mussels
(Live fish and aquatic bait may not be transported from this water)

Council Grove Reservoir

3,280 acres, 1 mile N of Council Grove on K-177.

Channel Catfish - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 20 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Spotted Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 15-inch minimum length limit, 5 fish daily creel limit. **Saugeye** - 15-inch minimum length limit, 5 fish daily creel limit. **Wiper** - 18-inch minimum length limit, 2 fish daily creel limit.

ANS Alert - Zebra Mussels
(Live fish and aquatic bait may not be transported from this water)

El Dorado Reservoir

8,000 acres, 3 miles E, 2 miles N of El Dorado.

Blue Catfish - 25- to 35-inch slot length limit, 5 fish daily creel limit with no more than two fish 35 inches or longer. **Channel Catfish** - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 20 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Smallmouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Spotted Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 21-inch minimum length limit, 2 fish daily creel limit. **Wiper** - 21-inch minimum length limit, 2

fish daily creel limit. **Rainbow Trout** - 5 fish daily creel limit.

ANS Alert - White Perch and Zebra Mussels
(Live fish and aquatic bait may not be transported from this water)

Elk City Reservoir

4,450 acres, 4 miles NW of Independence.

Blue Catfish - 35-inch minimum length limit, 5 fish daily creel limit. **Channel Catfish** - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 50 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Saugeye** - 15-inch minimum length limit, 5 fish daily creel limit.

Fall River Reservoir

2,500 acres, 56 miles E of Wichita on US-400.

Channel Catfish - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 50 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Spotted Bass** - 15-inch minimum length limit, 5 fish daily creel limit.

Glen Elder Reservoir

12,586 acres, 12 miles W of Beloit on US-24.

Blue Catfish - 35-inch minimum length limit, 5 fish daily creel limit. **Channel Catfish** - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 10-inch minimum length limit, 20 fish daily creel limit. **Largemouth Bass** - 18-inch minimum length limit, 5 fish daily creel limit. **Smallmouth Bass** - 21-inch minimum length limit, 5 fish daily creel limit. **Spotted Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 18-inch minimum length limit, 5 fish daily creel limit. **Wiper** - 2 fish daily creel limit. **Striped Bass** - 2 fish daily creel limit. **Rainbow Trout** - 5 fish daily creel limit.

ANS Alert - Zebra Mussels
(Live fish and aquatic bait may not be transported from this water)

Hillsdale Reservoir

4,580 acres, 3 miles NW of Paola.

Channel Catfish - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 10-inch minimum length limit, 20 fish daily creel limit. **Largemouth Bass** - 18-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 18-inch minimum length limit, 5 fish daily creel limit.

ANS Alert - Zebra Mussels
(Live fish and aquatic bait may not be transported from this water)

John Redmond Reservoir

9,400 acres, 2 1/2 miles N of Burlington on US-75.

Blue Catfish - 35-inch minimum length limit, 5 fish daily creel limit. **Channel Catfish** - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 50 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 15-inch minimum length limit, 5 fish daily creel limit. **Saugeye** - 15-inch minimum length limit, 5 fish

daily creel limit. **Wiper** - 2 fish daily creel limit. **ANS Alert - Zebra Mussels**
(Live fish and aquatic bait may not be transported from this water)

Kanopolis Reservoir

3,550 acres, 33 miles SW of Salina on K-149 and K-141.

Blue Catfish - 5 fish daily creel limit. **Channel Catfish** - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 50 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 18-inch minimum length limit, 5 fish daily creel limit. **Saugeye** - 18-inch minimum length limit, 5 fish daily creel limit. **Wiper** - 2 fish daily creel limit. **Rainbow/Brown Trout** - 5 fish daily creel limit.

ANS Alert - Zebra Mussels
(Live fish and aquatic bait may not be transported from this water)

Keith Sebelius (Norton)

2,300 acres, 3 miles SW of Norton off US-36.

Channel Catfish - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 50 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Spotted Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 18-inch minimum length limit, 5 fish daily creel limit. **Saugeye** - 18-inch minimum length limit, 5 fish daily creel limit. **Wiper** - 5 fish daily creel limit.

Kirwin Reservoir

5,000 acres, 15 miles SE of Phillipsburg on K-9

Channel Catfish - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 50 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 15-inch minimum length limit, 5 fish daily creel limit. **Wiper** - 5 fish daily creel limit.

La Cygne Reservoir

2,600 acres, 5 miles E of La Cygne

Blue Catfish - 5 fish daily creel limit. **Channel Catfish** - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 50 fish daily creel limit. **Largemouth Bass** - 18-inch minimum length limit, 5 fish daily creel limit. **Smallmouth Bass** - 18-inch minimum length limit, 5 fish daily creel limit. **Wiper** - 18-inch minimum length limit, 2 fish daily creel limit. **Striped Bass** - 18-inch minimum length limit, 2 fish daily creel limit.

Lovewell Reservoir

2,986 acres, 4 miles E, 10 miles N of Mankato on US-14.

Blue Catfish - 35-inch minimum length limit, 5 fish daily creel limit. **Channel Catfish** - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 10-inch length limit, 20 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 18-inch minimum length limit, 5 fish daily creel limit. **Wiper** - 2 fish daily creel limit.

Creel limits for similar species, including largemouth bass, smallmouth bass, and spotted bass; or walleye, saugeye, and sauger; apply to single species or in combination. For example, at Kanopolis Reservoir, an angler may keep five walleye OR three walleye and two saugeye OR any other combination of the two. Blue catfish and channel catfish now have separate creel limits. A blue catfish is identified by having 30 or more rays in the anal fin. A channel catfish has less than 30 rays in the anal fin.

LOCATIONS, LENGTH AND CREEL LIMITS

Marion Reservoir

6,160 acres, 4 miles NW of Marion off US-56.

Channel Catfish - 10 fish daily creel.

Flathead Catfish - 5 fish daily creel limit.

Largemouth Bass - 18-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 21-inch minimum length limit, 5 fish daily creel limit.

Wiper - 5 fish daily creel limit. **Crappie** - 20 fish daily creel limit.

ANS Alert - Zebra Mussels

(Live fish and aquatic bait may not be transported from this water)

Melvern Reservoir

7,000 acres, 35 miles S of Topeka on US-75.

Blue Catfish - 35-inch minimum length limit, 5 fish daily creel limit. **Channel Catfish** - 10 fish daily creel. **Flathead Catfish** - 5 fish daily

creel limit. **Crappie** - 10-inch minimum length limit, 20 fish daily creel limit. **Largemouth Bass** - 18-inch minimum length limit, 5 fish daily creel limit. **Smallmouth Bass** - 18-inch minimum length limit, 5 fish daily creel limit.

Spotted Bass - 18-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 18-inch minimum length limit, 5 fish daily creel limit.

Sauger - 18-inch minimum length limit, 5 fish daily creel limit.

ANS Alert - Zebra Mussels

(Live fish and aquatic bait may not be transported from this water)

Milford Reservoir

16,020 acres, 5 miles NW of Junction City on US-77.

Blue Catfish - 25- to 40-inch slot length limit, 5 fish daily creel limit, may include only one fish 40 inches or longer. **Channel Catfish** - 10 fish daily creel. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 50 fish daily creel limit.

Largemouth Bass - 15-inch minimum length limit, 5 fish daily creel limit. **Smallmouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Spotted Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 21-inch minimum length limit, 2 fish daily creel limit. **Wiper** - 5 fish daily creel limit.

ANS Alert - Zebra Mussels

(Live fish and aquatic bait may not be transported from this water)

Perry Reservoir

11,600 acres, 18 miles NE of Topeka on US-24.

Blue Catfish - 35-inch minimum length limit, 5 fish daily creel limit. **Channel Catfish** - 10 fish daily creel. **Flathead Catfish** - 5 fish daily

creel limit. **Crappie** - 10-inch minimum length limit, 20 fish daily creel limit. **Largemouth Bass** - 18-inch minimum length limit, 5 fish daily creel limit. **Smallmouth Bass** - 18-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 18-inch minimum length limit, 5 fish daily creel limit. **Sauger** - 18-inch minimum length limit, 5 fish daily creel limit.

Sauger - 18-inch minimum length limit, 5 fish daily creel limit.

ANS Alert - Zebra Mussels

(Live fish and aquatic bait may not be transported from this water)

Pomona Reservoir

4,000 acres, 25 miles S of Topeka on US-75.

Channel Catfish - 10 fish daily creel. **Blue**

Catfish - 5 fish daily creel limit. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 50 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel

limit. **Walleye** - 18-inch minimum length limit, 5 fish daily creel limit. **Wiper** - 18-inch minimum length limit, 2 fish daily creel limit.

ANS Alert - Zebra Mussels

(Live fish and aquatic bait may not be transported from this water)

Toronto Reservoir

2,800 acres, 15 miles W of Yates Center on US-54.

Hiawatha City Lake

7 acres, 1 mile S of Hiawatha.
Channel Catfish - 15-inch minimum length limit, 5 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 2 fish daily creel limit.

Holyrood City Lake

12 acres, 10 miles N of Holyrood
Channel Catfish - 5 fish daily creel limit.
Largemouth Bass - 15-inch minimum length limit, 5 fish daily creel limit.

Creel limits for similar species, including largemouth bass, smallmouth bass, and spotted bass; or walleye, saugeye, and sauger; apply to single species or in combination. For example, at Kanopolis Reservoir, an angler may keep five walleye OR three walleye and two saugeye OR any other combination of the two. Blue catfish and channel catfish now have separate creel limits. A blue catfish is identified by having 30 or more rays in the anal fin. A channel catfish has less than 30 rays in the anal fin.

6 acres, Gage Park, 6th and Gage, Topeka.
Channel Catfish - 2 fish daily creel limit.
Flathead Catfish - 5 fish daily creel limit.
Crappie - 50 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit. **Wiper** - 2 fish daily creel limit.

Uniontown School Pond
2 acres, Uniontown.
Channel Catfish - 15-inch minimum length limit, 2 fish daily creel limit. **Largemouth Bass** - 18-inch minimum length limit, 2 fish daily creel limit.

Valley Center - Arrowhead Park Lake
5.4 acres, Valley Center.
Largemouth Bass - 18-inch minimum length limit, 2 fish daily creel limit.

Valley Center - McLaughlin Pond
3 acres, 716 McLaughlin, Valley Center.
Channel Catfish - 2 fish daily creel limit.
Largemouth Bass - 18-inch minimum length limit, 2 fish daily creel limit.

Wamego City Lake 
5 acres, Wamego.
Channel Catfish - 10 fish daily creel. **Crappie** - 50 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit.

Waterville City Lake
9 acres, 1 mile W, 1 mile N of Waterville.
Channel Catfish - 10 fish daily creel. **Crappie** - 50 fish daily creel limit. **Largemouth Bass** - 15-inch minimum length limit, 5 fish daily creel limit.

Wellington - Hargis Creek Lake
65 acres, E edge of Wellington.
Channel Catfish - 15-inch minimum length limit, 5 fish daily creel limit. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 50 fish daily creel limit. **Largemouth Bass** - 18-inch minimum length limit, 2 fish daily creel limit.
Saugeye - 18-inch minimum length limit, 2 fish daily creel limit.

Creel limits for similar species, including largemouth bass, smallmouth bass, and spotted bass; or walleye, saugeye, and sauger; apply to single species or in combination. For example, at Kanopolis Reservoir, an angler may keep five walleye OR three walleye and two saugeye OR any other combination of the two. Blue catfish and channel catfish now have separate creel limits. A blue catfish is identified by having 30 or more rays in the anal fin. A channel catfish has less than 30 rays in the anal fin.

LOCATIONS, LENGTH AND CREEL LIMITS

COMMUNITY LAKES CONTINUED

Wellington City Lake

674 acres, 5 miles W, 1 1/2 miles S of Wellington.

Channel Catfish - 15-inch minimum length limit, 5 fish daily creel limit. **Flathead Catfish** - 5 fish daily creel limit. **Crappie** - 20 fish daily creel limit. **Largemouth Bass** - 18-inch minimum length limit, 2 fish daily creel limit. **Walleye** - 18-inch minimum length limit, 5 fish daily creel limit. **Saugeye** - 18-inch minimum length limit, 5 fish daily creel limit. **Wiper** - 18-inch minimum length limit, 2 fish daily creel limit.

ANS Alert - Zebra mussels

(Live fish and aquatic bait may not be transported from this water)

Wichita - Arkansas River

Above Lincoln St. Dam, Wichita.

Fishing and bait collection is prohibited in the Lincoln Street Fishway.

ANS Alert - White Perch

(Live fish and aquatic bait may not be transported from this water)

Wichita - Chisholm Island Pond

(Live fish and aquatic bait may not be transported from this water)

Wyandotte Co. Pierson Park Lake

12 acres, 55th & Douglas, Kansas City.

See Local Regulations

Yates Center Kid's Pond

4 acres, Yates Center.

See local regulations.

Yates Center City Lake

200 acres, 2 miles W, 3 S of Yates Center.

Channel Catfish - 15-inch minimum length limit, 2 fish daily creel limit. **Crappie** - 20 fish daily creel limit. **Largemouth Bass** - 13-18-inch slot limit, 5 fish daily creel limit. **Walleye** - 15-inch minimum length limit, 2 fish daily creel limit. **Wiper** - 18-inch minimum length limit, 2 fish daily creel limit.

Yates Center - South (Owl)

250 acres, 1/2 mile S of Yates Center.

Channel Catfish - 15-inch minimum length limit, 2 fish daily creel limit. **Crappie** - 10-inch minimum length limit, 10 fish daily creel limit. **Largemouth Bass** - 18-inch minimum length limit, 5 fish daily creel limit. **Walleye** - 15-inch minimum length limit, 2 fish daily creel limit. **Wiper** - 18-inch minimum length limit, 2 fish daily creel limit.

Creel limits for similar species, including largemouth bass, smallmouth bass, and spotted bass; or walleye, saugeye, and sauger; apply to single species or in combination. For example, at Kanopolis Reservoir, an angler may keep five walleye OR three walleye and two saugeye OR any other combination of the two. Blue catfish and channel catfish now have separate creel limits. A blue catfish is identified by having 30 or more rays in the anal fin. A channel catfish has less than 30 rays in the anal fin.

CONTACTS

GAME WARDENS

Anyone who finds evidence of wildlife crime while afield should contact their local game warden. Details of the crime and any other information, such as license tag numbers, dates, and times, should be noted. Local game wardens can be contacted through county sheriffs' offices, by phoning the KDWP's **Operation Game Thief, 1-877-426-3843**, or by phoning one of the numbers listed below, for the county in which the crime was witnessed.

Do NOT use these numbers for general information calls. General information may be obtained by phoning the department's Public Affairs Section, (620) 672-5911, or by calling local offices listed in this publication.

If you're an active outdoorsman or woman, or just concerned about conservation in your area, get to know your local game warden. They protect the resource in your area. The following list of game warden numbers and the counties for which they are responsible are provided to help concerned citizens curb wildlife crime in Kansas:

County	Officer Phone	County	Officer Phone	County	Officer Phone
Allen	(620) 212-0183	Johnson	(785) 256-3611	Rush	(620) 770-6083

TRANSFERRING FISH OR GAME TO ANOTHER PERSON?

Stay legal. Make sure you provide the following information with each transfer.

- Hunting/fishing license, transaction, or big game permit number
- Person Giving Fish/Game
- Person Receiving Fish/Game
- Date Taken
- Date Transferred
- Fish/Game Type and Quantity
- Signature of Giver
- Address of Giver

A hunter education card number or date of birth may be substituted for a hunting license number for hunters under 16 years of age. Hunters over 16 years of age may provide hunting license number. All big game transfers must include permit numbers.

Hunting/fishing license, transaction, or big game permit number _____

I, _____

give permission to _____

to receive _____

WILD-CAUGHT BAIT

Live baitfish, crayfish, leeches, amphibians, and mussels may be caught and used as live bait only within the common drainage where caught. However, bluegill and green sunfish collected from non-designated aquatic nuisance waters may be possessed or used as live bait anywhere. Live baitfish shall not be transported and used above any upstream dam or barrier that prohibits the normal passage of fish. Live baitfish collected from designated aquatic nuisance waters shall be possessed or used as live bait only while on that water and shall not be transported from the water alive.

AQUATIC NUISANCE SPECIES (ANS)

PROTECT KANSAS WATERS BY CLEANING, DRAINING AND DRYING

STOP AQUATIC HITCHHIKERS!

Please Remember
CLEAN • DRAIN • DRY

Boats and Equipment

ANS Awareness Course
ProtectKS Waters.org

IT IS AGAINST BOTH STATE AND FEDERAL LAW TO RELEASE ANY EXOTIC SPECIES IN KANSAS WATERS.

Habitattitude™

PROTECT OUR ENVIRONMENT
DO NOT RELEASE FISH AND AQUATIC PLANTS

PIJAC • U.S. FISH & WILDLIFE SERVICE • NOAA'S SEA GRANT

www.Habitattitude.net

It is illegal to transport certain species in Kansas. Protect yourself and your natural resources.

Livewells and bilges must be drained and drain plugs removed from all vessels being removed from waters of the state before transport on a public highway.

Before leaving any body of water:

CLEAN

Inspect all equipment for anything attached (plants, animals, and mud) and **remove** anything that is found.

DRAIN

Drain all water from equipment (livewell, bilge, bait buckets) before using at a different location.

DRY

Dry all equipment for a minimum of 5 days before using again. If you need to use it sooner, **wash** with hot (140°) water.

Non-native species pose a serious threat to Kansas waters. If you find one of these species, do not release it back into the water. Contact the Emporia Research Office at (620) 342-0658 or your local KDWPT office. For more information go to the KDWPT website, ksoutdoors.com

Alternatives to Release

- Contact a retailer for proper handling advice or for possible returns
- Give/trade with another aquarist, pond owner, or water gardener
- Donate to a local aquarium society, school, or aquatic business
- Seal aquatic plants in plastic bags and dispose in the trash
- Contact a veterinarian or pet retailer for humane disposal guidance
- Know your state regulations regarding these alternatives

ZEBRA MUSSEL

• Zebra mussels are found in the Kansas lakes and impoundments designated with the red "ANS Alert - Zebra Mussels" in the "Locations, Length and Creel Limits" listing on Pages 18-37 of this pamphlet, as well as the rivers that flow from these impoundments. Fish may not be transported live from these waters.

• They filter vast quantities of water, which alters the entire food web within a water-body. Although this filtering action may clear up the water in some instances, the clear water will often lead to algae blooms that are harmful to people. The clear water can also allow UV rays to damage fish eggs.

• They can reach high densities, causing problems to water intakes, docks, and boat motors. Nationwide expenditures to control zebra mussels in industrial plants alone are estimated at \$310 million per year.

• They have sharp shells that can cut the unprotected skin of humans or pets. Shoes or other protective clothing are recommended when wading in zebra mussel infested water.

• All aquatic users need to do their part to prevent the spread of zebra mussels to other waters in Kansas. Follow control recommendations and tell others how to prevent the spread of zebra mussels.

WHITE PERCH

• White perch are found in the Kansas lakes and impoundments designated with the red "ANS Alert - White Perch" in the "Locations, Length and Creel Limits" listing on Pages 18-37 of this pamphlet. Fish may not be transported live from these waters.

• White perch have been associated with declines in both walleye and white bass populations.

• They out-compete native fishes for food and space.

• They hybridize with white bass.

• KDWPT has added white perch to the prohibited species list. The possession of live white perch is prohibited. Dead white perch may still be possessed or used as bait on the waters where they were taken.

• Spiny and soft dorsal fins are connected; both fins pop-up when spiny dorsal manually erected.

AQUATIC NUISANCE SPECIES (ANS)

ASIAN CARP

- Asian carp include bighead, silver, and black carp species.
- Bighead and silver carp can be found in the Kansas, Missouri, Wakarusa, and Big Blue rivers and their tributaries. Fish may not be transported live from these waters.
- These fish are highly adaptive, prolific spawners, and directly compete with other fish for food and space.
- Silver carp pose a physical danger to boaters because of their leaping ability.

SALT CEDAR (TAMARISK)

- Salt cedar is a small tree or shrub that produces pink flowers May through October and can be found in 49 Kansas counties.
- It forms dense monocultures and dramatically changes vegetation structure and animal species diversity.
- It accumulates salt in its tissues, which is later released, making soil unsuitable for many native plant species.
- Infestations of salt cedar can reduce or eliminate water flow in streams.
- Leaves, twigs, and seeds are extremely low in nutrients, and, as a result, very few insects or wildlife will use them.

EURASIAN WATERMILFOIL

- Eurasian watermilfoil forms dense mats on the water's surface.
- It reproduces by fragmentation, and plant fragments can be transported by boaters.
- It will shade out native vegetation and reduce oxygen levels during decomposition.
- Eurasian watermilfoil forms a dense canopy that hinders recreational activities.

FERTILE GRASS CARP

- It is illegal to possess or import fertile grass carp.

**KEEP THE WATER
SAFE AND CLEAN FOR FUTURE FISHING**
Report dumping, pollution
to the EPA at 1-800-223-0425

NEW ZEALAND MUD SNAIL

- The New Zealand mudsnail (NZMS) has not been reported in Kansas, but is considered a priority species because of the late 2004 introduction into Colorado.

- Mature New Zealand mudsnails average 5mm (2/10-inch) in length and have brown or black cone-shaped shells with five whorls.

- NZMS disrupt the food chain by consuming algae in the stream and competing with native bottom-dwelling invertebrates. A population crash of invertebrates can follow the introduction of NZMS, which reduces fish forage. With a decrease in food availability, fish populations may decline as well.
- Mudsnails are able to withstand desiccation, a variety of temperatures, and are small enough that many types of water users (anglers, swimmers, pets) could inadvertently transfer them. It takes only one snail to start an infestation.

PURPLE LOOSESTRIFE

- Purple loosestrife is established in several areas across Kansas.
- Loosestrife restricts native wetland plant species, including some federally endangered orchids, and reduces habitat for waterfowl.
- It is highly tolerant to disturbance and reproduces through the dispersal of thousands of tiny seeds.

FISH IDENTIFICATION GUIDE

Fish illustrations by Joseph R. Tomelleri

STRIPED BASS

The striped bass, or striper, is a saltwater native. Populations are maintained through stocking. Stripers have slender bodies: measurement from belly to back is generally less than one-third their length. They have distinct unbroken horizontal stripes. It is common for them to reach and exceed 20 pounds. Their spiny and soft dorsal fins are not connected; both fins do not pop-up when the spiny dorsal is manually erected. The back of the tongue has TWO tooth patches. Striped bass are temperature sensitive and fishing is usually best in winter, spring, and early summer.

WIPER

Wipers are a hybrid of white bass and striped bass, and they grow fast and fight hard. Populations are maintained through stocking. Small wipers look like white bass. They are deep-bodied: measurement from belly to back is generally more than one-third their length. They have distinct broken horizontal stripes. They may exceed 10 pounds. Spiny and soft dorsal fins are not connected; both fins do not pop-up when the spiny dorsal is manually erected. The back of the tongue has TWO tooth patches. Casting jigs, spoons or topwater plugs in spring and early summer is the most exciting way to catch them.

WHITE BASS

Native to eastern Kansas rivers, white bass have been stocked in reservoirs throughout the state. White bass are deep-bodied: measurement from belly to back is generally more than one-third their length. They generally do not have distinct horizontal stripes. They seldom exceed 3 pounds. Spiny and soft dorsal fins are not connected; both fins do not pop-up when spiny dorsal is manually erected. Back of tongue has ONE tooth patch. The spring spawning run is a great time to catch white bass in rivers and streams above reservoirs.

WHITE PERCH

White perch are an invasive species and it is illegal to possess them alive. However, many anglers fish for them and enjoy eating their white, delicious meat. It's important for anglers to be able to tell them apart from white bass. White perch do not have a central tooth patch on their tongue and they do not have defined horizontal lines like white bass. Notice, too, that the spiny dorsal and soft dorsal fins are connected.

LARGEMOUTH BASS

The largemouth bass is native to many streams in eastern Kansas and has been stocked in most reservoirs, lakes, and ponds throughout the state. Largemouths are usually found near aquatic vegetation or other structure. The largemouth's upper jaw extends beyond the eye. April and May are the best months to fish for largemouths. Best lures include spinnerbaits, jig-and-pig combinations, plastic worms, and crankbaits.

SMALLMOUTH BASS

Smallmouth bass are native to just a few streams in southeastern Kansas, but they have been stocked in several lakes and reservoirs. Smallmouths prefer clear water around rip-rap and rocky points. Brown to olive-green markings and an upper jaw that does not extend beyond the eye distinguish the smallmouth. The best months to catch smallmouths include April, May, and June. Best baits include curly-tail jigs, tube jigs, spinner baits, and crankbaits.

SPOTTED BASS

Spotted bass, or Kentucky bass, are native to the clear streams of the Flint Hills. They have been stocked in several reservoirs and lakes. The upper jaw does not extend beyond the eye, and they have distinct dark-green, diamond-shaped blotches along the upper half of the body. They also may have rows of dark spots along the lower belly. Small jigs, spinners, crankbaits, wooly worms, wooly buggers, and poppers are best baits.

FISH IDENTIFICATION GUIDE

Fish illustrations by Joseph R. Tomelleri

FLATHEAD CATFISH

Native to most of the state's rivers, the flathead has adapted well to reservoirs. Flatheads are mottled brown/black to pale yellow in color. They have a broad flat head which has a lower jaw that extends beyond the upper jaw. Flatheads are generally much larger than channel cats, with weights of over 100 pounds reported. The anal fin has less than 30 supporting rays with round edge and a square, non-forked tail. Banklines, rod and reel, and trotlines are all popular methods, using live bait.

BLUE CATFISH

The blue catfish is native to rivers in northeast Kansas and has been stocked in select Kansas reservoirs, where it has flourished. Blues are pale blue in color although white or dark blue and black are not uncommon. The head generally appears small with a distinct hump in younger fish. The lower jaw is even with the upper jaw and weights of over 100 pounds have been reported. The anal fin is long, containing 30 or more supporting rays with a flat edge and the tail is forked. Blues are usually caught with cut or dead bait.

CHANNEL CATFISH

Channel catfish are native to Kansas and each year millions are stocked in community, state, and urban fishing lakes. They are often brownish-yellow in color with a white belly. Juveniles will have black or brown spots (See inset illustration) and spawning males can be dark blue in color. The lower jaw is even with the upper jaw and weights rarely exceed 30 pounds. The channel's anal fin is shorter than the blue, with less than 30 supporting rays and a round edge. The tail is forked. Reservoirs, streams, state fishing lakes and ponds all provide excellent channel catfish angling opportunities. They can be caught using bank lines, trot lines and rod and reel, using dead or prepared bait – the smellier the better.

BULLHEAD

There are three species of bullheads in Kansas: the black, yellow, and brown. The black bullhead is common to streams and ponds, and the less common yellow is found mostly in the eastern half of the state. The bullhead is dark-green or yellow-green with a white or yellowish belly. The black bullhead is usually larger than the yellow and the barbels on the lower jaw are darker than the surrounding skin. The yellow's barbels on the lower jaw are white. Bullheads exceeding 2 pounds are uncommon. Bullheads are great fish for young anglers, biting readily on worms, liver and dead bait.

BLUEGILL

Bluegill are native to eastern Kansas streams and have been stocked in ponds and lakes throughout the state. A saucer-shaped sunfish with a namesake blue tab on its gill cover, the bluegill is a popular sportfish that readily takes bait or small lures. It is a fine eating fish as well. Early June, when they move into the shallows and dish out small nests for spawning, is a great time to catch them. Fly gear is particularly effective at this time.

GREEN SUNFISH

The green sunfish is one of the most abundant sunfish in Kansas. It has the blue tab on its gill cover, but is somewhat less saucer shaped than the bluegill and has a noticeably larger mouth. Fins are usually edged in yellow. The green sunfish, or "greenie," is a great fish for kids and will nearly always hit small baits and lures.

FISH IDENTIFICATION GUIDE

REDEAR SUNFISH

The redear sunfish is an introduced species, stocked in small lakes and farm ponds. It is similar in shape to the bluegill and has a red trim around the tab on its gill cover. Redears get bigger than bluegill and are generally more difficult to catch. Called shellcrackers in the South, redears will feed on snails and other mollusks. Redears generally prefer deeper water than other sunfishes and are not usually found near shorelines.

BLACK CRAPPIE

The non-native black crappie has been stocked in reservoirs, and especially in smaller lakes and ponds. Black crappie have a dark green, uniform speckled coloration with no vertical barring. There are seven or eight spines in the dorsal fin. Black crappie prefer clear lakes or ponds and are not as prone to overpopulating as white crappie. April and May are best months to catch black crappie, and jigs, minnows, and small spinners are best baits.

WHITE CRAPPIE

The native white crappie is one of the most abundant and popular sportfish in Kansas. Vertical barring evident in the speckled coloration on white crappie distinguish them from black crappie. White crappie have six spines in the spiny dorsal fin, while black crappie have seven or eight. White crappie are generally found in large schools. April and May are the best months to catch white crappie, and best baits include minnows, jigs and small spinners.

PADDLEFISH

The unusual paddlefish is found in a few of the larger rivers of eastern Kansas, common only in the spring when they move upstream to spawn. They feed on plankton, and the only way to catch them is snagging. A special snagging season has been established on a few streams during the spring migration. Anglers use heavy tackle and hooks tied specifically for snagging. Paddlefish are long and thick bodied. They are blue in color with white bellies. They have a long snout, which readily identifies the fish from other species. Weights of over 100 pounds have been reported but 30 to 50 are more common.

WALLEYE

Stocked in many Kansas reservoirs, the walleye is a member of the perch family. The walleye is thick-bodied and brown/black and yellow in color with indistinct blotches on the sides, not extending below the lateral line. The spiny dorsal fin has indistinct streaks or blotches with a distinct dark blotch at its rear base. The cheekplate is smooth with few scales. April, May and early June are the best months to catch them. Anglers troll crankbaits or drift jigs with live bait to catch these fish.

SAUGER

Sauger are common in the Missouri River, and some may be found in the Kansas River. They have been stocked in several northeast Kansas reservoirs. The sauger is thin-bodied and brown/black and yellow in color, with distinct blotches on the sides extending below the lateral line. The spiny dorsal fin is colorless with distinct circular black spots throughout. Their cheekplates are rough with scales. Drifting jigs or spinner rigs tipped with bait over main-lake points and mudflats is a popular angling technique with these fish.

SAUGEYE

The saugeye is a hybrid of a sauger and walleye and was first stocked in Kansas in 1990. Like other hybrids, the saugeye is hardy and grows fast. The saugeye is thick-bodied and brown/black and yellow in color, with distinct blotches on the sides extending below the lateral line. The spiny dorsal has distinct streaks, often with one or two rows of spots at the base along with a dark blotch at the rear base of the fin. It's cheekplate is rough with scales. Saugeye are often caught drifting flats and main-lake points with jig-night crawler combinations and trolling crankbaits.

FISH IDENTIFICATION GUIDE

Fish illustrations by Joseph R. Tomelleri

NORTHERN PIKE

The northern pike is a rare introduced species. It was stocked in the late 1960s as a means of controlling panfish. However, few Kansas waters provide the northern with suitable habitat. The northern pike prefers clear, weedy water. They are long and thick bodied. Occasionally, smaller lakes are stocked with northern pike to help control populations of undesirable fish, as well as provide anglers with an exciting opportunity.

BIGMOUTH BUFFALO

The bigmouth buffalo is native to the larger rivers of eastern Kansas, and has become abundant in many reservoirs. The buffalo feeds on plankton and is considered a nonsport fish. With an angled sucker mouth, the buffalo doesn't feed on the bottom. At one time, it was an important commercial fish, and is still taken by commercial netters for fish markets. The buffalo prefers deep, still pools and can become quite numerous in oxbows and reservoirs.

COMMON CARP

The common carp was brought to the U.S. from Asia in the late 19th century. Originally stocked for a sportfish, the adaptable carp was soon considered a nuisance. Carp are common in nearly all waters in Kansas. They feed mostly on invertebrates and green plant material. Anglers use dough baits or corn to catch carp, and they fight hard. Intermuscular bones make the meat less desirable, but it has many fans who have learned to prepare it properly.

DRUM

The drum is common in eastern Kansas rivers and streams and has adapted well to reservoirs. Also called sheepshead, the drum emits a grunting, or drumming, noise with special muscles that vibrate against the swim bladder. Jigs, jigs tipped with night crawlers, and crankbaits will catch drum, although a gob of worms stillfished might be the best technique. Although defined as a nonsport fish, their meat is white and tasty.

GRASS CARP

The grass carp is an introduced species brought from Asia. The grass carp's diet is entirely vegetation, and it has been stocked to control aquatic vegetation. Only non-fertile, or triploid, grass carp may be stocked. Grass carp get big and are extremely powerful swimmers. Anglers have discovered they can be caught on small flies imitating bits of vegetation, and hooking a large grass carp can be a wild experience. Considered a nonsport fish, grass carp are legal bowfishing quarry.

RAINBOW/BROWN TROUT

Trout provide a winter fishery where they are stocked. Populations are maintained through winter stocking, and generally most of the stocked fish are caught during the Nov. 1 – April 15 season. However, the Mined Land Unit #30 in Cherokee County provides year-round trout fishing. Anglers are required to have a trout stamp in addition to the required licenses. A variety of methods are popular, from fly tackle or spinners to worms and PowerBait fished on the bottom.

FISH IDENTIFICATION GUIDE

LONGNOSE GAR

The longnose gar is native to most of the rivers in the eastern half of Kansas and is the most abundant and largest of the three gar species. It is greenish in color with dark spots on its sides and fins and can be distinguished by its long, narrow snout, which is more than twice as long as the distance between the edge of the eye and the back of the head. The bony mouth makes it almost impossible to hook, so anglers use spinners with nylon thread instead of hooks. The nylon tangles in the fine teeth that line the jaws.

SHORTNOSE GAR

The shortnose gar has jaws less than twice the length of its head and has spots on its fins but differs from the spotted gar by the absence of spots on its head. The shortnose gar is common only in the larger rivers of eastern Kansas. Most shortnose gar are less than 24 inches long.

SPOTTED GAR

The spotted gar has jaws less than twice the length of its head and is spotted with dark, round spots on the top and sides of its head. Most spotted gar are less than 30 inches long. Like other gars, it is covered with a tough armor of thick, heavy scales. It may be confined to the lower Neosho basin where it prefers still pools.

PALLID STURGEON

The pallid sturgeon is native to the Missouri and Mississippi River drainages and are present in the Kansas River. The largest one documented in Kansas was over 40 inches long. It is listed as an endangered species in Kansas and can be distinguished from the more common shovelnose sturgeon in that the four fringed barbels are not in a straight line across the snout, and the belly is usually scaleless. The dorsal fin has 37-43 rays and the anal fin has 24-28 rays. Young pallid sturgeon that are stocked into the Missouri River may have fluorescent-colored tags on the underside of the snout. If you catch a sturgeon that is larger than 30 inches or weighs more than 5 pounds, it is likely a pallid sturgeon and must be released immediately.

SHOVELNOSE STURGEON

The shovelnose sturgeon is common in the Missouri, Kansas and Republican rivers and in lower parts of the Blue and Smoky Hill rivers. There is also a single record from the Arkansas River in Sedgwick County. Adults are usually 20-25 inches long. Often caught by anglers fishing with worms, the shovelnose can be distinguished from the endangered pallid in that the belly has small bony scales, and the four fringed barbels beneath the snout are in a straight line. The dorsal fin has 30-36 rays and the anal fin has 18-23 rays.

LAKE STURGEON

The lake sturgeon may be found in the Missouri and Kansas rivers in Kansas. The largest documented lake sturgeon was caught in Atchison County on the Missouri River and weighed 12.5 pounds and was 40 inches long. It is considered endangered in Kansas and can be distinguished from the other Kansas sturgeon by its short, bluntly-shaped snout that is not upturned. It's overall body shape is blunter than the other two sturgeon, as well, with a shorter tail and tail fin. The pectoral fins just behind the gills are smaller in comparison to body size than the other Kansas sturgeons.

RECORD APPLICATION

A potential state record fish must remain intact until officially confirmed.

Get the fish to a grocery store or other business with certified scales as soon as possible. The weighing must be done before the fish is frozen and must be witnessed. The fish must be species confirmed by a KDWP fisheries biologist or a Fisheries Division regional supervisor. (A tissue sample may be required.) A color photograph of the fish must accompany the application. Fish species that are threatened or endangered will not be accepted.

All applications for state records require a 30-day waiting period before certification.

AWARDS AND RECORDS

MASTER ANGLER

If you catch a fish in Kansas, by any legal means, that is at least as long as the lengths shown below, you are entitled to a Master Angler Award. Measurements are in inches.

	Inches		Inches		Inches
Largemouth Bass.....	23	Paddlefish.....	41	Grass Carp.....	34
Smallmouth Bass.....	18	Sauger.....	20	Shovelnose Sturgeon.....	25

PROGRAMS

COMMUNITY FISHERIES ASSISTANCE PROGRAM

The Kansas Department of Wildlife, Parks and Tourism' (KDWPT) Fisheries Division will continue the Community Fisheries Assistance Program (CFAP) in 2020. Using matching funds from federal excise taxes on fishing equipment and motor boat fuel, the department leases fishing rights on nearly 240 community lakes statewide, removing additional fishing and boating fees for anglers on approximately 13,000 acres of water.

The program uses federal aid from the Sport Fish Restoration Act (see Page 7).

Communities that participate in this program no longer charge anglers to fish. In the

past, some communities charged boating and fishing fees for anglers. KDWPT officials hope removing this barrier increases opportunities for anglers to fish close to home.

Lakes that were not charging fees are also included in the program. Lease money for these lakes can be used to improve fisheries and angler facilities. KDWPT has designed a lease rate formula based on the number of surface acres, quality of the fishery and facilities at these lakes. Larger lakes offering more facilities will receive greater lease

amounts than smaller lakes with fewer facilities. This formula allows KDWPT to offer the program to everyone.

Along with the lease payments, the department provides participating local governments with increased access to resources and contact with district fisheries biologists. Lakes in the program also receive priority for fish stocking, habitat improvement services, and additional improvement grants. This ultimately improves fisheries management and facilities for Kansas anglers.

All waters enrolled in CFAP are listed in the "LOCATIONS, LENGTH AND CREEL LIMITS" section of this publication. Community lakes not enrolled in CFAP are designated with this symbol ●.

TROUT PROGRAM

Since 1997, the department has annually stocked as many as 180,000 rainbow trout that average one-half pound each at more than 30 locations across the state. The trout fishing season is Nov. 1-April 15. This program is funded with a state trout permit and federal aid dollars. For more information on the stocking locations and schedule, see Page 13 of this publication or visit our website at ksoutdoors.com.

URBAN FISHERIES PROGRAM

To improve fishing opportunities in urban areas where the demand for fish exceeds the supply, KDWPT created an urban fish stocking program. Eighty lakes currently are stocked with 3/4- to 1 1/2-pound channel catfish and hybrid sunfish as often as every two weeks from April through September. If you live in the listed counties, you have an urban lake near you. These are great locations for a quick family fishing trip. Just throw the gear in the car and make the short drive to the nearest designated urban fishing lake. The counties served by the program are Atchison, Barton, Butler, Douglas, Ellis, Finney, Ford, Johnson, Leavenworth, Lyon, Ottawa, Seward, Pottawatomie, Reno, Riley, Saline, Sedgwick, Shawnee, Thomas and Wyandotte.

To get a complete list of the individual lakes and a stocking schedule, contact your nearest KDWPT office or the KDWPT website at ksoutdoors.com.

FISHING CLINICS

Fishing clinics are conducted by department employees at state fishing lakes, parks, and city lakes and ponds. Most are geared toward younger children and others who may not have much experience with fishing techniques and tactics. They are held throughout the spring and summer months and occasionally in the fall.

Content covered in a clinic varies by presenters, but all have fishing as a central theme. Fish identification, management, casting demonstrations, equipment, water safety, and even fish cooking are a few areas covered. Plenty of time is devoted to baiting hooks and catching fish, too. The primary species caught during fishing clinics include bluegill, green sunfish, channel catfish, and largemouth bass.

Rods, reels, and other necessary fishing equipment will be provided for use in clinics.

Fishing clinics serve to educate and entertain thousands of Kansas youngsters each year. Information and experience gained during these clinics remain with children forever. Those involved learn to appreciate the joys fishing can offer and the rewards of a fine day on the water.

If you would like more information on fishing clinics in your area, contact the nearest KDWPT office or the Pratt Operations Office at (620) 672-5911.

PROGRAMS

F.I.S.H.: ACCESS TO PRIVATE PROPERTY

The Fishing Impoundments and Stream Habitat program, or F.I.S.H., will be renamed. Beginning in 2021, the program will be referred to as the Walk-in Fishing Access program, or W.I.F.A.

The Fishing Impoundments and Stream Habitat (F.I.S.H.) program has gained popularity with landowners and anglers alike. The program enrolled 1,900 acres of ponds and more than 70 miles of streams on private land for public fishing access. The program includes ponds and lakes ranging in size from 1 acre to more than 70 acres, as well as access to stream reaches formerly unavailable to the public.

The F.I.S.H. sites are open to public access from March 1 through October 31. (Some are open year-round.) Impounded FISH waters have a creel limit of two channel catfish, a creel limit of two largemouth bass, and an 18-inch minimum length limit on largemouth bass. Otherwise, all Kansas fishing regulations and statewide creel limits apply. It's especially important for anglers using the sites to respect and follow the rules that apply on F.I.S.H. properties. You do not need to contact the landowner for permission on F.I.S.H. waters.

Anglers who want more information should contact the nearest KDWP office or the department's Pratt Operations Office at (620) 672-5911 for a Kansas Fishing Atlas. That information is also available on the KDWP website, ksoutdoors.com.

Landowners who are interested in enrolling waters in the program should also phone the nearest regional KDWP office or the Pratt Operations Office.

W.I.F.A. Application

I am interested in enrolling my property in the W.I.F.A. program.

The W.I.F.A. program's goal is to increase public fishing opportunities in Kansas in cooperation with private landowners.

Annual Payment Rate

Impoundments	\$75-\$125/acre
Stream	\$500-\$1,500/mile
Big River Access	\$1,500-\$2,000

OUTDOOR SKILLS PROGRAMS FOR WOMEN

What's your interest? Fishing, hunting, shooting sports, canoeing, birdwatching, wild game cooking, archery, botany, camping, and orienteering are just a few of the outdoor skills classes offered at women's workshops planned this year in Kansas. Knowledgeable and experienced instructors provide a fun, enjoyable, and productive learning opportunity.

The department's "Becoming An Outdoors-Woman" (BOW) program – conducted each fall at Rock Springs 4-H Center near Junction City – offers a variety of fun, challenging, hands-on classes. The Spring BOW workshop will be conducted May 1-3, 2020. The 2020 BOW fall workshop will be in September. Visit the KDWP website, ksoutdoors.com, and click on "Education" for more details.

ANGLER INSTRUCTOR EDUCATION

If you have a passion for the outdoors and enjoy sharing your knowledge with others, this program may be for you. The Angler Education Program is designed to recruit individuals who have a passion for fishing and want to share it with others. The Kansas Department of Wildlife, Parks and Tourism (KDWP) has partnered with Fishing's Future, a not-for-profit group with a mission to reconnect kids with nature, strengthen family bonds, and instill a responsibility for stewardship of our natural resources.

Similar to KDWP's Hunter Education Program, Angler Education will certify instructors who will become volunteers of the State of Kansas. Certification events will qualify instructors to teach everything from class design, and working with children, to environmental stewardship, knot tying, fish identification, and casting.

Certified instructors may work alone or with other instructors to teach general fishing information, specific fishing techniques, or just take families fishing.

To become a Kansas Angler Instructor, visit fishingsfuture.org and look for upcoming certification events in your area.

STATE PARKS

Kansas State Parks

More Than Meets The Eye

The Kansas Department of Wildlife, Parks and Tourism manages 28 state parks across the state. Most provide utility and primitive camping, cabins, and access to reservoirs, trails, and wildlife areas. A few are preserved natural areas, allowing visitors to enjoy unspoiled wild Kansas. Many parks host annual events such as concerts, festivals, and competitions. Whatever your outdoor interest — hiking, camping, wildlife observation, fishing, bike riding, horseback riding, hunting, or just plain relaxing, a Kansas state park has what you're looking for. If you've never been to a Kansas state park, use the following map and charts to help find the nearest one and plan a visit. Current park fees are listed on Page 5 and on ksoutdoors.com. Call one of the offices listed on Page 4 of this publication for details on our parks services. If you haven't visited a state park recently, look again — *there's more than meets the eye.*

CABINS

Cabins Make Perfect Base Camps

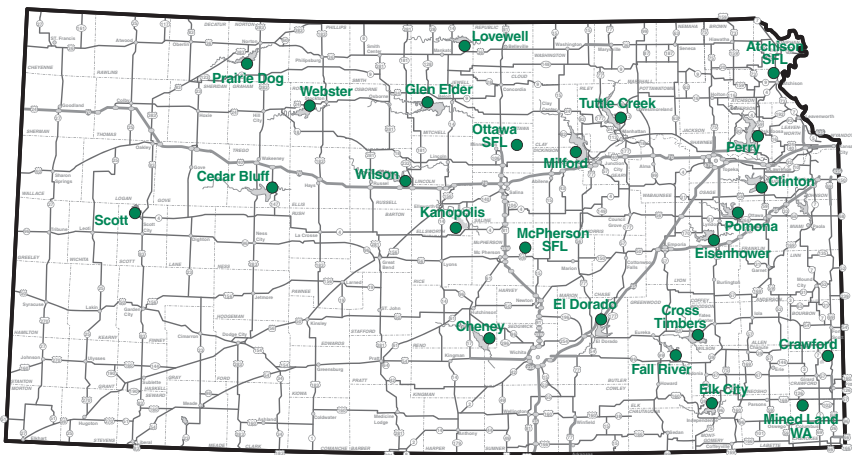

Complement any trip with a relaxing stay at a Kansas state park or wildlife area cabin. One hundred twenty-one cabins are available across the state, located at 19 state parks and six wildlife areas and one at the state fair grounds in Hutchinson.

The cabins offer a wide range of amenities. Deluxe cabins feature heating and air conditioning, and most have furnished kitchens with refrigerators, stoves, microwaves and coffee pots; separate bedrooms and full bathrooms with showers. Basic sleeper cabins are more rustic with fewer amenities. Most cabins can sleep four to six adults while others can sleep up to 10 adults. About half of the cabins are ADA accessible. Nightly rental rates vary depending on location, season, day of the week and available amenities.

Reserve your cabin online at reserve.ksoutdoors.com. You can review cabin amenities, check prices and availability, and reserve a cabin up to a year in advance. Online instructions guide you through the reservation process.
